CONTENT

Introduction	5
Key questions related to the geomorphology of this excursion	9
Princess of Ukok	12
Part I. Upper Biya River valley and the Teletskoye Lake	16
NE Altai Regional settings and Quaternary history: General overview	16
Stop B1. Former glacial-dammed lake in the Yogach valley	23
Stop B2. Former alluvial-dammed lake in the Turachak valley	27
Stop B3. Teletskoye Lake and lacustrine terrace at Yaylyu	31
Geomorphic history of the Teletskoye Lake – Biya valley system: synthesis	35
Part II. Middle Katun River valley	39
Brief introduction	39
Stop K1. Catafluvial deposits of the high (Inya) terrace in the vicinity of the Bolshoi Yaloman River	41
Stop K2. Boulder field at km 702	51
Stop K3. High terraces of the Katun and Injushka Rivers at the Inya village	57
Stop K4. Composition and geochronology of the low (Saldzhar) terrace at the Chuya River confluence	68
Part III. Middle Chuya River valley, Kuray and Chuya Basins	73
Stop C1. Early Holocene seismic fall and dammed lake formation at the Sukhoi brook	73
Stop C2. Late Pleistocene glacial damming of Chuya at Kuektanar tributary valley	77
Stop C3. Lower Chagan-Uzun river: the Late Pleistocene maximal glacial advance	84
Stop C4. Beltir village: consequences of the year 2003 seismic hazard	87
Stop C5. Earthquake triggered giant landslides in the Taldura valley	92
Stop C6. Kuray dunes	99

Stop C7. Kuray strandlines	102
Stop C8. Early Holocene lake in the western part of the Kuray Basin: the Baratal section	108
Stop C9. The Chuya spillway upstream from the Chibit town	112
Stop C10. Old valley of Chuya, age and mechanism of abandonment	115
 References	 120
 Supplements	 125
S1. Large boulder transport	125
S2. Problems of absolute dating of glacial deposits in Russian Altai by the example of the Chagan section	130
S3. The recurrence interval of strong prehistoric earthquakes in the SE Altai (the Kuray-Chuya active zone) based on dendroseismological approach and radiocarbon analysis	133
S4. Radiocarbon chronology of the Holocene landscape evolution within the Kuray-Chuya system of intermountain depressions	135
